PFLEIDERER

TO BE COMPLETE,
YOU NEED TO COLLABORATE.

Which is exactly what we did when creating this collection. Joining forces with the leading washroom fabricators and industry experts to discuss all things "washroom" helped us to identify their key requirements and compile the Washroom Collection 2024–2028. With this in mind, the collection has been designed specifically to meet the wants and needs for the UK & Ireland market. You asked, we delivered.

40 innovative designs means you'll have no problem finding the perfect decor that will set your project apart. Available in 3 different core substrates that have been engineered for specific applications, meaning that each project can be tailored to the needs of the area and application.

Each design is available with a matching decor and texture combination in High-pressure laminate (HGP), Compact Grade Laminate (CGS), DecoBoard P3 / Moisture Resistant Melamine Faced Chipboard (MR MFC). This variety of cores means cost and technical aspects can be engineered without the detriment of the project suitability, durability or budget.

Another bonus for this collection is an integrated protection as standard. Pfleiderer products actively contribute to health protection by reducing the risk of infection to people. Our standard HPL products eliminate 99.9 % of all surface bacteria within 24 hours.

MAKE YOUR VISIONS WORK.

EXACTLY WHAT YOU NEED.

Suitable concepts for every application
From design to completed project, every step counts. After all, designs are only really appealing if they can also be brought to life. By choosing Pfleiderer, you're off to the right start. Aesthetic, functional and by design.

With Pfleiderer, you can expect a high level of quality as standard. You can rely on security and transparency.

Producing wood-based materials sustainably and in the highest quality is a challenge.
As a leading company in the wood industry, Pfleiderer faces up to this challenge at all levels – and with traditional entrepreneurial diligence. With modern production sites, an integrated management system for quality, environment, energy and safety, and a corporate culture that continuously develops these values. Because for these practices, the compatibility of quality and sustainability is a matter of course!
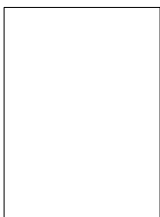

MADE IN GERMANY

SIZE IS EVERYTHING.

We understand that size options don't only give you more scope for greater design possibilities, our board sizes have been designed to offer full utilisation in the most popular washroom applications, meaning less wastage and greater control.
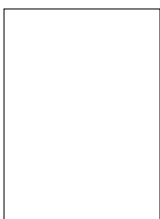

High-pressure laminate (HGP) 0.8 mm

3,050 x 1,300 mm   **2,800 x 2,070 mm**
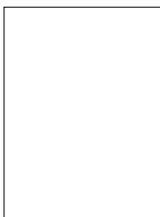

Compact Grade Laminate (CGS) 12 mm

2,800 x 2,070 mm   **1,860 x 2,070 mm**

DecoBoard P3 / Moisture Resistant Melamine Faced Chipboard (MR MFC) 19 mm

2,800 x 2,100 mm

IT'S WHAT'S INSIDE THAT COUNTS.

Washroom solutions demand panels that perform, however applications such as toilet cubicles, vanity units, IPS systems and lockers don't always necessarily require the same performance characteristics. That's why every decor in the collection is available in 3 core substrates so you can tailor the performance requirements to the project and budget.

High-pressure laminate (HGP)
High-pressure laminate with decorative surface and sanded reverse.

Compact Grade Laminate (CGS)
Compact grade High-pressure laminate with a black core and decorative surface on both sides.

DecoBoard P3 / Moisture Resistant Melamine Faced Chipboard (MR MFC)
Melamine faced decorative boards with moisture resistant chipboard core material.

WE'RE NEVER BOARD WITH
WHAT YOU CREATE.

We are never ceased to be amazed with
what you create using our boards, designs
and your imagination.

CREATIVITY HOLDS NO BOUNDS.

Pfleiderer's "Individual" is the solution for those who require full creative freedom. You design your own decor, create bespoke one-off panels utilising our state-of-the-art digital printing technology. Photo, illustration, company logo – anything is possible on any core material, regardless of whether as a high-quality HPL or melamine faced chipboard in direct facing. The Pfleiderer product range also has optimal solutions for special requirements such as wet rooms, healthcare environments or laboratories. Robust, easy-care, scratch resistant, hygienic and food-safe, the finished board leaves nothing to be desired. The only limitation is your imagination.

CREATIVITY YOU CAN FEEL.

Creativity that appeals to all the senses. Surface textures play an important role in making our decorative wood-based panels truly unique. They open up exciting possibilities and give each design its own special look and feel. We have selected textures that are perfectly tailored to every décor with fascinating depth effects and extremely robust properties – let your sense of touch guide you!
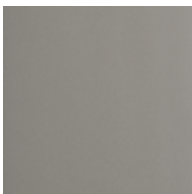

SD Sandpearl
The sandy pearl structure is homogeneous and multi-directional, the fine grain is sharp-edged and precise. A matt and delicate surface with a modern and well-balanced appearance.

VV Top Velvet
Top Velvet is a fine parchment structure and is universally applicable. The restrained gloss-matt effect and its discreet parchment gives class and elegance to all directionless decors.

RU/RT Rustic Wood
The depth and expression of this structure give striped woodgrains a sporty look. The gloss-matt effect and the natural irregularity of the grain make woodgrains look very authentic.

PROTECTION INTEGRATED AS STANDARD.

For those wanting to add more value to their washroom projects all Pfleiderer products are now available through special order with the added protection of antimicrobial as well as antiviral surface microPLUS®. The integrated hygiene protection offers active and effective protection against bacteria and viruses.

SUSTAINABLE TO THE CORE.

Sustainability at Pfleiderer

Responsibility for tomorrow starts today. Those who rely on wood as a raw material rightly expect an environmentally conscious "green" material. We at Pfleiderer want to do full justice to this and have therefore been offering an extensive range of low-emission and environmentally friendly products for many years. Sustainability – in addition to ecological, social and economic aspects – as well as careful use of natural resources are a permanent pillar of our corporate philosophy. Consistent recycling management and wood recycling ensure that no trees are felled for our products. Through regular independent evaluation of our procurement and production processes, we are able to ensure that we can offer our customers the best possible service, manufacturing and logistics processes as well as a corporate culture of accountability. We ensure that you can use our products with a clear conscience and recommend them to your customers.

FIRE PROTECTION

We also have the ability to offer High-pressure laminate (HGP), Compact Grade Laminate (CGS) and Melamine Faced Chipboard (MFC) as Pyroex fire protection products. This is particularly useful in public spaces and applications where the subject of constructional fire protection is required.
